SPOT DYE PENS

For Nylon and Wool

INTRODUCTION:

Easy to use Spot Dye Pens are designed
for discolorations on Nylon and Wool
carpeting. Just heat and apply. No
mixing. No mess. Each dye pen will
cover more than 100 spots. This
permanent dye will not wash out or rub
off.

PROCEDURE:

STEP 1: Apply Bleach Neutralizer
directly to bleach spot and work down
to the base of fibers. If you are not
covering up a bleach spot, simply wet the
discolored area with hot water to
dampen all fibers.

STEP 2: Heat Dye Pen with CAP OFF!
Dye should be at least 130 degrees.

Heat in pot of boiling water. Sit pen in
water, cap off, top side up.

OR

Microwave on "**Low**" or "**Defrost**"
setting with cap off for 20 second
intervals until hot. (Failure to put on low
setting, or microwaving for larger intervals
can result in dye spillage !)

STEP 3: Test color by lightly applying a small amount of dye to a Q-tip or towel and then applying to your carpet. Start with the lightest color first if multiple colors are present.

STEP 4: If color achieved is desirable apply a small amount of hot dye directly to carpet and gradually work dye to the base of fibers. Repeat as necessary to cover entire spot. Use towel to blend if needed.

Warning- If you do not like the color of the dye on your spot stop immediately and use Dye Pen Remover. A Dye Pen Remover can also be used to blend the color into the outside edge of the spot.

STEP 5: Once color is desired, leave spot to dry. Spot should take no more than 12 hours to dry depending on whether conditions. Heat and air movement reduces drying time.

Helpful Hint: Think of applying dye like you would a cosmetic; dab a little on and rub in until you like how it looks. Don't use too much & start light. You might not get the spot to look perfect, but it will look better than it did before.

OTHER PRODUCTS AVAILABLE

The Americolor Corp is the oldest and largest carpet dye company in the United States and can supply all your carpet dye needs for nylon and wool carpeting. Being that we have over 100 years of cumulative experience in making dyes and chemicals you can rest assured knowing that you are using the best quality dyes and chemicals available.

Below you will find other recommended dye and chemical pens. All pens start at \$13.95 each.

BLEACH NEUTRALIZER PEN:

A must have for bleach spots. This special formula deactivates bleach crystals that are left in the carpet from chlorine and can reactivate every time moisture is present for up to 2 years. No dye job is complete without this product.

DYE REMOVER PEN:

The best product available to erase your dye mistakes with. Also great for blending colors. Professionals never perform a spot dye job without this essential product.

SPOT REMOVER PEN:

Get rid of dirt and other stains with this specially formulated product that will remove dirt, grease, cosmetics and food stains such as coffee, chocolate, tomato and teriyaki sauces.

KOOL-AID REMOVER PEN:

Get rid of tough Kool-Aid stains as well as other sports drinks, juices, and beverages containing red dye number 40. Also works for red wine and ink!

SPOT DYE KITS:

Wanna mix and match colors like the professionals do? Our beginner and professional spot dye kits offer a wide range of colors in liquid or powder form. Have the ability to color match up to 99%.

DYE MASTERS COLOR GUIDE:

The only way to truly test your color match without putting dye on your carpet. This manual comes with colored slides, gray scale and DVD. Be able to know exact color formulas for over a million colors
